

BIORAMI

Carded hemp fiber

Used to produce hemp yarn. Long hemp fiber ready for combing.
Mixed short and long fiber with small shive content.

Short carded fiber

Both flax and hemp fiber. It is created when fiber is carded into yarn.
It is a short fiber that is not suitable for the production of yarn and
tape, but is successfully used to produce disinfection mats and wall
hangings for animals.

Handled hemp fiber

Long hemp fiber ready for combing. We use them to produce combed
hemp fiber.
