

BIORAMI

Hemp combs

Short waste fiber obtained in the process of combing long fiber. The nozzles can be successfully used to produce yarn or hemp ribbon.

Cotonine

A short fluffy fiber and used for upholstery purposes.
A yarn obtained by cotonizing flax and hemp fibers, used to make cotton wool, and in combination with other fibers to make felt.
Depending on its parameters, cotonine is used in the textile, furniture, automotive and construction industries.

Hemp tape

Pure hemp fiber, free from shives and other impurities. Used for spinning purposes or as insulation when building wooden log houses.
