

# BIORAMI

Fibre shred

A short, fine fiber obtained in the process of pulling e.g. jute bags.  
Can be used to produce disinfection mats.

Linen-hemp yarn 0.40

Stronger and more durable than TEX 2500 yarn thanks to the addition of hemp fiber, which is characterized by a longer length of individual threads and greater breaking strength. This yarn can be used for wrapping parcels, tying bales or bouquets, as well as for producing ropes.

TEX 2500 linen yarn

Ecological and biodegradable, it can be used for packaging, wrapping and in agriculture for tying hay or straw bales.
