

BIORAMI

TEX 2500 yarn with polypropylene thread

Intermediate yarn additionally reinforced with polypropylene thread, which is intended to strengthen the yarn against breaking.

Linen yarn 2200X 3

Thick, triple-twisted yarn made of three single strings. It is characterized by greater breaking strength and greater stiffness. It is perfect for wrapping bouquets of linen and flowers. Very good works well in the production of ropes and in agriculture as a string for wrapping bales.

Linen-hemp yarn TEX 2200X 2

Double twisted Tex 2200X 2 yarn, which makes it stronger and more resistant to breaking and stretching. Used for tying, for example, tobacco bundles and for the production of ropes.
