

BIORAMI

TEX 2200X 3 + N linen-hemp twine

Triple twisted 2200 yarn with an additionally woven polypropylene thread, whose task is to strengthen the yarn and make it more resistant to breaking while maintaining the same string diameter.

TEX 3300/4000 linen yarn

It can be used for packing, tying and wrapping. It is characterized by greater thickness and greater durability than Tex 2500 yarn

Flax straw

Used for fiber production. The purpose of the fiber is similar to that of hemp fibers, except that flax fiber is shorter, but more delicate and pleasant to the touch.
